Dental Chair

APPLEDENTAL

0123

Appledental Technology are focusing on developing and producing dental handpieces and dental chairs ISO 13485:2016

INTRODUCTION OF

APPLIEDENTAL

APPLIEDENTAL which had been founded in 2008, has focused on developing and producing dental handpiece at the beginning. At present years, we start to produce dental chair.

As focusing on quality and service and working on professional production of “dental handpiece” & “dental chair”, more and more dentists like to use APPLIEDENTAL products, not only for our favorable price, but also stable quality. We export to more than 105 countries, and there are exclusive agent and have professional after-sale teams in 34 countries.

QUALITY IS OUR CULTURE. We control our quality from each small spare part to semi-finished product, then to finished product. For handpiece there are at least 14 procedures and for chair at least 39 procedures. With more than 170 workers, we all follow the motto of our company “Quality, safety is life & source of enterprise.”

Compared with other companies, we care more about the cooperation with our dealers and agents, which we are growing together, and win-win together. We will help our partners to set up price protection system, support on exhibition shows and train the salesman with professional knowledge.

We are looking for more and more partners to be our APPLIEDENTAL family members. Join us!

APPLIEDENTAL, creating for u.

Cact aluminum technology make the backrest more beautiful, more strong and more durable. The thickened PU bent plate makes the connection between the back and the scat more perfect.

In order to provide a perfect operate experiente, we designed 2 sets of control panel on both sides of the instrument panel.It's a built-in X-film wiewer in the middle place, but we also provide a upgraded solition with color screen system, which can display the whole operation process dynamically(option).

The humanized leather design, with high quality internal materials, is a guarantee for the patient's long-term comfort during treatment.

NEW

Patent model Folded chair
